DETAILED ACTION

1. Newly submitted claims 16-18 and 20-22 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: these claims recite limitations from the non-elected claims.
2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16-18 and 20-22 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 14, 15, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Noakes et al. (US Patent 4,854,506).

Noakes et al. '506 shows an aerosol spray apparatus which carries out the method comprising:

- providing a nozzle 81 and an electrode 97 separated by a predetermined distance (see the embodiment of Figure 7);
- placing the electrode at a high electrical potential relative the nozzle, either of positive or negative polarity as recited;

- ejecting a liquid or powder from the nozzle towards the electrode to atomize the ejected liquid or powder into aerosol droplets or particles as recited, the aerosol droplets or particles obtaining an induced electric charge which is of the same polarity as the high voltage electrode (Column 5, lines 12-14); and
- after the aerosol droplets or particles pass the vicinity of the electrode, forming a directed spray of aerosol droplets or particles as recited.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Noakes et al. (US Patent 5,779,162) and Williams et al. are pertinent to Applicant's invention.
